

# **Handyhood**

## **Mission Objectives :**

- **User Management:**
  - Creating and storing user profiles along with their login information and skills.
- **Tasks Management:**
  - Storing list of predefined tasks or issues which require a skilled handyman.
- **Skills Availability Management:**
  - Storing list of different skills and number of handymen available with respect to the skill.
- **Help request Management:**
  - Creating and storing an issue raised by a user of the community on demand.
  - Keeping track of the users who have volunteered to help.
- **Reviews Management:**
  - Keep track of all the feedback given to each handyman for each task completed.
- **Notification Management:**
  - Create a notification when a task is available which can be used by the handyman to take up a job.
  - Provide status of the job.
  - Remove the notification once the task is unavailable/completed.

## **Team Members:**

- **Shreyas Shekar (002314635)**
- **Prahlad Narayan (002825948)**
- **Chenxu Shan (002303787)**
- **Juan Noronha (002317317)**
